

PLUG-IN TO THE JOYS  
OF HOT TUBBING™

FREEFLOW SPAS®

### Plug In

Save time and money with our plug-n-play technology. No additional wiring required. Simply fill up your hot tub, plug it into any standard 110v outlet, and enjoy!

### Affordable

Manufactured using a rotational molding process which reduces material and labor costs, making them more affordable than traditional, acrylic hot tubs.

### Portable

Renting? Moving? Or possibly redoing your backyard? No worries! Our lightweight spas can be taken with you and remain a part of your family wherever you go.

### Energy Efficient

Each spa features full foam insulation to provide maximum efficiency and low monthly operating costs. Freeflow Spas are certified to the guidelines set forth by the California Energy Commission (CEC).

**RANKED #1  
FOR VALUE**

*In an independent survey by SpaRetailer™ Magazine, Freeflow® Spas was ranked #1 in Value for three years in a row, surpassing 22 other hot tub brands for this top honor.*

Thanks to our unique PLUG and PLAY technology, Freeflow Spas do not require any additional wiring or plumbing. Simply set it in place, fill it up with a garden hose, and plug it into any standard 110v outlet. Then just set the temperature, and once it reaches the desired level, you can begin enjoying your new hot tub.

There is no need to turn the temperature down when not in use. Freeflow Spas are energy efficient and offer low monthly operating costs. The hot tub's internal thermostat, energy efficient full foam insulation, and locking thermal cover will keep the water hot all the time, so it's always ready whenever you are. Because of these energy saving features, it conforms to the strict guidelines set forth by the California Energy Commission.

Additional features include simple and intuitive digital controls, a multi-color underwater light, built in ice buckets, and an easily accessible top loading filter.

Choose the optional ozone water care system to help keep your spa water crystal clear and reduce the amount of chemicals needed, allowing you to spend less time and money maintaining your spa and more time enjoying it.

Freeflow Spas are rotationally molded; a process that is more automated and less labor intensive than that of traditional acrylic hot tubs, making them more affordable without sacrificing quality.

Each spa is tested and certified under strict ISO 9001 standards before leaving our factory, so you can expect a top quality product from the time of delivery...and for years to come.

Purchasing a hot tub from a TradeCertified manufacturer, like Freeflow Spas, means your local retailer has selected one of the most reputable spa manufacturers in North America. You can rest assured knowing that you're getting one of the best performing hot tubs on the market.
